Netaphor Launches Version 5.1 of Managed Print Services Tools

*SiteAudit v5.1 On-Site and Hosted Tools Add Capability to Create
Application Specific Data Fields*

Irvine, Calif. – 31 January, 2012 - Netaphor, a provider of managed print services (MPS) software, today announced the release of SiteAudit v5.1. The release provides fleet managers the capability to create application specific data fields. Examples of application specific data fields include lease, contract, warranty and service tracking information. Once created a service provider can enter the most recent repair information or a facility manager can generate reports based on lease and warranty expiration dates. Application specific data fields provide fleet managers the flexibility to add and track information that is wanted but the printer does not have.

New features of v5.1 include:

Custom Fields

1. Up to 15 text, data and number data fields can be created
2. Filtering views and alerts based on application specific data

Alerting

1. Alerts the notify when an incident has been resolved
2. Alert rules based on application-specific data

SiteAudit v5.1 software can be downloaded from the Netaphor web site (www.netaphor.com).

About Netaphor

Founded in 1997 and headquartered in Irvine, Calif., Netaphor Software, Inc. develops and sells software for managed print services. The company's flagship product, SiteAudit On-Site, is the industry's first software suite to identify, reduce and manage printer costs, saving organizations up to 30 percent during the printer asset lifecycle. SiteAudit customers include organizations in all industries including Spectrum Health, Jacobs Engineering and Children's Hospital of Philadelphia.
