Netaphor Launches Version 6.1 of Managed Print Services Tools

SiteAudit v6.1 Adds Wide Format and Double Click Support

Irvine, Calif. – 15 December, 2014 – Netaphor (www.netaphor.com), a provider of managed print services (MPS) software, today announced the release of SiteAudit v6.1. The release provides the capability for MPS providers to track, analyze and bill for wide-format use and double-click (total usage) printing. MPS partners can now charge customers with wide format devices based on their usage instead of only the number of wide-format consumables purchased. Likewise partners can charge based on a double click (ledger or A3 page count as two pages) even if the device does not support a double-click counter per se. Presently these new features are supported for Canon and Hewlett Packard devices with support for more manufacturers in future releases.

Key features of V6.1 include:

1. Tracking support for paper usage as a Square Meter counter for Canon wide format (iPF and ColorWare) devices
2. Tracking support for Total Usage (double-click counters) for all HP and Canon devices

SiteAudit v6.1 software can be downloaded from the Netaphor web site located at (www.netaphor.com).

About Netaphor

Founded in 1997 and headquartered in Irvine, Calif., Netaphor Software, Inc. develops and sells software for managed print services. The company's flagship product, SiteAudit, is the industry's first software suite to identify, reduce and manage printer costs, saving organizations up to 30 percent during the printer asset lifecycle. SiteAudit customers include organizations in all industries including the Alberta Health, Jacobs Engineering and Children's Hospital of Philadelphia.
