Netaphor Launches Locally-Attached and Networked Scanner Support with Version 6.3 of Managed Print Services Tools

Version Tracks Scan and Roller Counts Enabling a Dealer Billing Model

Irvine, Calif. – 31 August, 2015 – Netaphor (www.netaphor.com), a provider of managed print services (MPS) software, today announced the release of the SiteAudit v6.3 for all SiteAudit products. SiteAudit v6.3 enables dealers the capability to invoice based scan counts for the Canon networked DR and locally-attached ScanFront models. The scan and roller tracking can also be included in audit and ongoing fleet analysis provided by SiteAudit Analyzer. "SiteAudit v6.3 provides the opportunity for a dealer to base sales on scanner usage," said Brian Anderson, Netaphor Vice President of Sales. "Now dealers can develop billing programs based on scanner usage much like they do for output devices."

The release provides SiteAudit Analyzer users with new charts for leasing and volume analysis with an optional Microsoft PowerPoint audit presentation. A new API called BackOffice Services that allows SiteAudit data to integrate seamlessly with invoicing, ERP, help desk and other applications. Application developers can also utilize the BackOffice Services ToolKit to create value-added services. SiteAudit v6.3 software can be downloaded from the Netaphor web site located at (www.netaphor.com).

Key features of SiteAudit v6.3:
1. Canon Scanners tracking support including asset details, scan and roller counts
2. New SiteAudit Analyzer Charts with an optional audit MS PowerPoint presentation
3. BackOffice Services providing data integration with ERP, Invoicing and other applications
4. Enhancements to Incident tracking and alerting using service codes
5. Bug fixes
