SITEAUDIT COMPACT - EASIEST WAY TO AUDIT YOUR ENVIRONMENT

**Netaphor
SiteAudit
Compact**

SiteAudit Compact is managed print software for performing remote assessments. It is completely secure and easy to operate. Just download SiteAudit Compact and run it. No software is installed and it collects data from all printer manufacturers and models; it even collects information about local printers without requiring desktop agents.

ASSESSMENT MEASURES
- ✓ PRINT VOLUMES
- ✓ CONSUMABLES
- ✓ LOCAL PRINTERS
- ✓ NETWORK PRINTERS

>01 Requires No Installation

SiteAudit Compact offers zero-touch installation. Organizations simply visit the Compact web site, enter their credentials for authentication, download the application, configure discovery and run it. Once the data collection period is over, just close it; there is nothing to remove.

>02 Local and Network Printer Data

Data collected from network printers includes color, B/W, copy, print, scan, fax and up to 28 separate counters. Local printer data is collected for the monitoring period and does not require installation of desktop agents. Data about consumables levels, coverage is also available.

>03 Remote Snapshot Assessment

SiteAudit Compact is used to take environmental snapshots. Data from these collections produce fresh and accurate measures of inventory, print volume and consumable levels. These snapshots make possible the perfect analysis for reducing costs and right-sizing the fleet.

SITEAUDIT COMPACT

"SiteAudit Compact was so easy to use and reduced our installation costs to almost nothing. It won quick IT approval! We collected all the critical data so our inventory and volume assessment was complete and accurate."

- Operations Manager, Leading Print Manufacturer
RAPID ASSESSMENTS
OVER the INTERNET

An assessment that is both rapid and remote, that collects all the critical data necessary to inform you about the printer environment. No worries about lengthy IT approval cycles or scheduling visits to install assessment keys. It is all done securely over the Internet with **SiteAudit Compact.**

» Audit Requirements

SiteAudit Compact is the downloaded application and collects printer data to the Netaphor hosted site. It has been design to achieve optimal performance in environments with less than 1500 printers and depending on bandwidth. Assessment site requirements are simple, a Windows machine with NET Framework 4.5.1 or later.
» What The Assessment Site Sees

Once the data collection has started the user sees the Inventory view. The MPS provider sees all collected data and may create reports or download pre-configured reports from the reporting web site.
MPS Provider Viewer

Use the Viewer to Create Reports or Pre-configured ones from the Reports Web Site

Reporting Web Site

Netaphor Hosted Site	→ Application → ← Secure HTTPS → ← Data ←	Customer Site

» Secure Transmission and Data Storage

SiteAudit Compact utilizes HTTPS, a secure mechanism to protect payment transactions and corporate information systems. Data integrity is maintained through authentication and firewall protection--the same mechanisms that protect most corporate data.

» Audit Analysis and Reporting

Make the analysis in SiteAudit Viewer then generate easy-to-read reports or select popular pre-configured reports from the Reporting Web Site. Export data in many formats including csv, xls, html and others.

» Using SiteAudit Installed Version

Comprehensive assessments that analyze user and service performance can be made with the installed version of SiteAudit. Ask about it.
