Netaphor Launches SiteAudit Version 6.5 with Expanded Counter and Asset Support

Version Tracks Device Firmware and Intermec Bar Code Printers

Irvine, Calif. – 19 December, 2016 – Netaphor (www.netaphor.com), a provider of managed print services (MPS) software, today announced the release of the SiteAudit v6.5 for all SiteAudit products. SiteAudit v6.5 provides tracking and reporting of device firmware versions. Fleet managers can now track firmware versions to determine if the existing firmware supports the features they require. Also support has been added to track the counters of Intermec bar code devices. “SiteAudit v6.5 provides partners the capability to track Intermec counts for billing on a cost per page basis,” said Brian Anderson, Netaphor Vice President of Sales.

SiteAudit v6.5 software can be downloaded from the Netaphor web site located at (www.netaphor.com).

Key features of SiteAudit v6.5:

- Track and display device firmware version in SiteAudit views
- Intermec device name, firmware version and label counters
- Report output formats expanded to support Excel XLSX
- Expanded supplies tracking for Canon, HP and Samsung
- Expanded counter tracking for Ricoh and Kyocera
- Invalid HP consumables data due to cover open is ignored

About Netaphor

Founded in 1997 and headquartered in Irvine, Calif., Netaphor Software, Inc. develops and sells software for managed print services. The company’s flagship product, SiteAudit, is the industry’s first software suite to identify, reduce and manage printer costs, saving organizations up to 30 percent during the printer asset lifecycle. SiteAudit customers include organizations in all industries including Jacobs Engineering and Children’s Hospital of Philadelphia.
