Netaphor Launches MPS Quarterly Business Review Solution

*SiteAudit QBR Analyzer Provides Partners with Solution to Review
Quarterly Performance with Customers*

Irvine, Calif. – 6 February 2017 – Netaphor (www.netaphor.com), a provider of managed print services (MPS) software, today introduced SiteAudit QBR Analyzer™. The solution provides a set of analysis charts for reporting fleet performance established by the MPS partner and customer. Most managed print service contracts require quarterly reports indicating progress towards meeting specific fleet targets. The Quarterly Business Review (QBR) Analyzer solution uses SiteAudit fleet data to chart trends and make comparisons between actual and contract targets about inventory, volume, supplies and user behavior. MPS providers can easily present device utilization trends, changes to inventory, projected supply stocks, user statistics and more as the basis for their quarterly customer reviews. QBR Analyzer benefits the partner customer relationship with an interactive comprehensive review of fleet performance.

Key QBR solution features include:

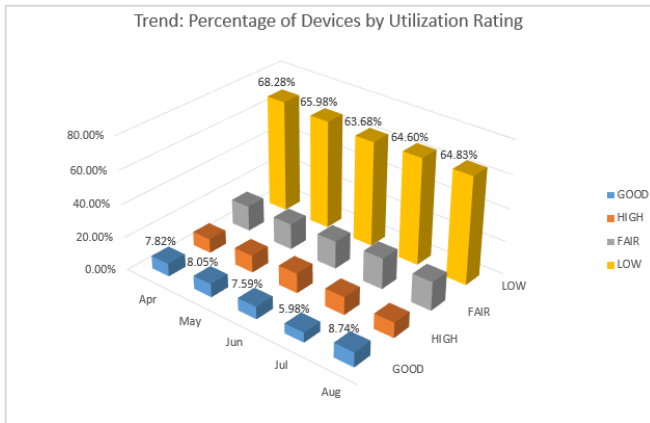

1. Presentation performance charts detailing inventory, volume, device utilization, supply usage and user metrics
2. Adjustable performance parameters enabling partners to set output, utilization and inventory targets
3. Report filtering to drill down on specific metrics by model, type, department and more
4. Easy-to-use navigation interface allows the MPS provider to access single or multiple SiteAudit customer databases

Partners with a SiteAudit Analyzer license can download the QBR solution from the Netaphor support portal <https://support.netaphor.com/>. Partners with a license may order a license from sales@netaphor.com

About Netaphor

Founded in 1997 and headquartered in Irvine, Calif., Netaphor Software, Inc. develops and sells software for managed print services. The company's flagship product, SiteAudit, is the industry's first software suite to identify, reduce and manage printer costs, saving organizations up to 30 percent during the printer asset lifecycle. SiteAudit customers include organizations in all industries including the Jacobs Engineering and Children's Hospital of Philadelphia.

Selection of QBR chart reports:

| Department | (All) | Project Supply Stock | | |
