

# SiteAudit Hosted v7

Netaphor SiteAudit™ Solutions for Auditing and Fleet Management

## Driving MPS Business Intelligence

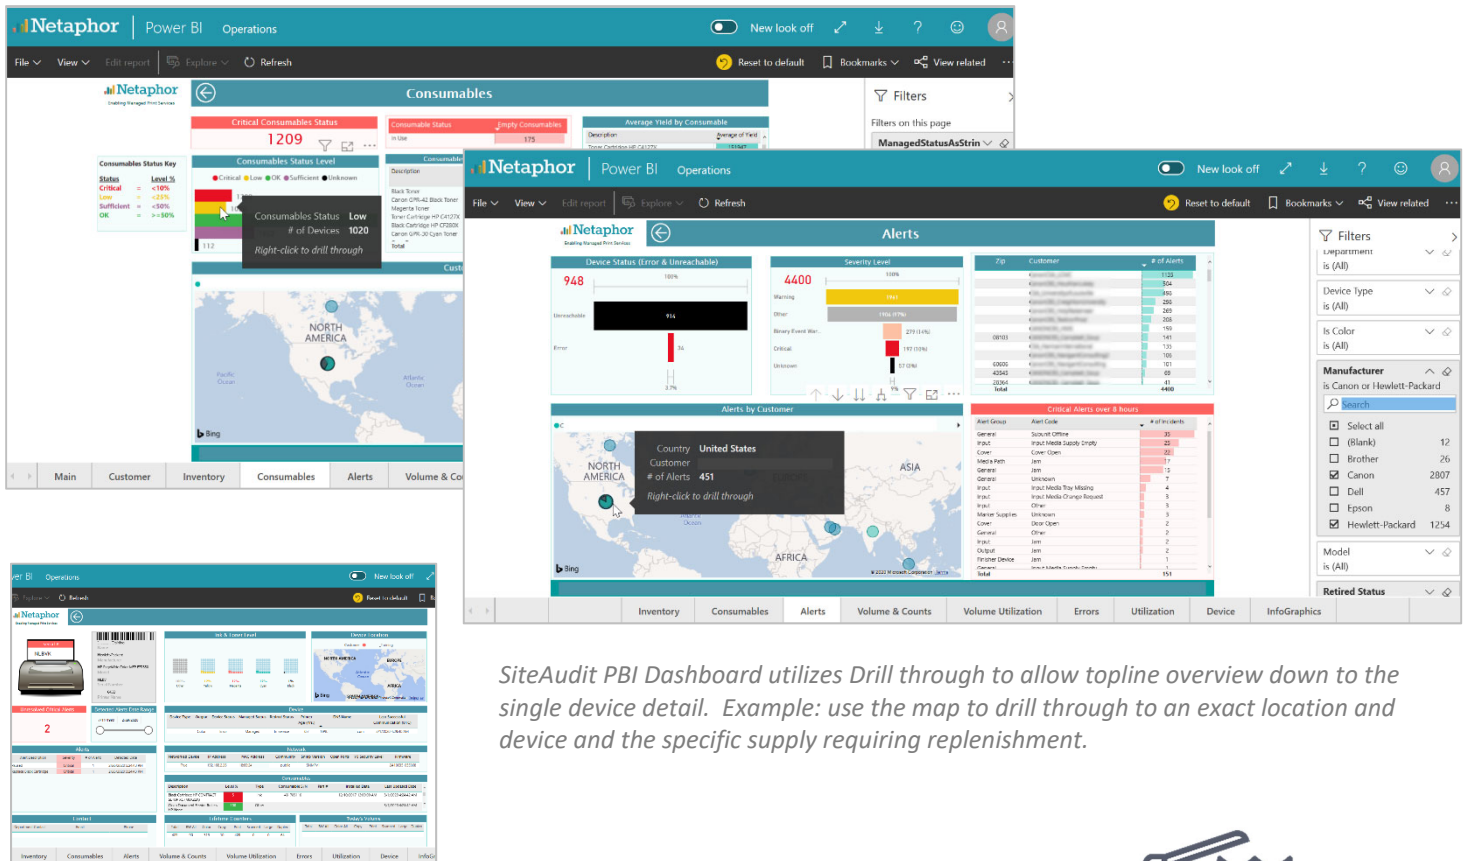

SiteAudit Hosted v7 delivers business intelligence to managed print services (MPS) via the cloud. It visualizes print data on Microsoft's Power BI platform transforming how users see critical print infrastructure information.

Hosted v7 offers the capability to remotely diagnose device and fleet problems to lower mixed fleet service costs. It can reduce fleet risks with security alerts when ports are changed. And the optional ServiceNow connector automates help desk workflows to further control costs. Hosted v7 is the next generation MPS solution.

Hosted v7 remote capabilities makes fleet management easy from anywhere. Whether it's error response or supplies replacement Hosted v7 provides the necessary data.

SiteAudit PBI Dashboard utilizes Drill through to allow topline overview down to the single device detail. Example: use the map to drill through to an exact location and device and the specific supply requiring replenishment.

Use the PBI Dashboard to manage operations and analyze trends
