SiteAudit Hosted v7 - Cloud
Netaphor SiteAudit^{TM} Solutions for Auditing and Fleet Management

Managing the Hybrid Office Fleet

SiteAudit Hosted v7 delivers business intelligence to managed print services (MPS) via the cloud. It visualizes print data on Microsoft's Power BI platform transforming how users see critical print infrastructure information.

SiteAudit Hosted v7 adds device tracking for hybrid workplaces. This provides centralized management of corporate and work from home fleets extending visibility and cost control over all devices no matter their physical location. Also featured in release 7.6 is support for Internet Protocol (IPv6) providing support for both IPv4 and IPv6 environments.   www.netaphor.com
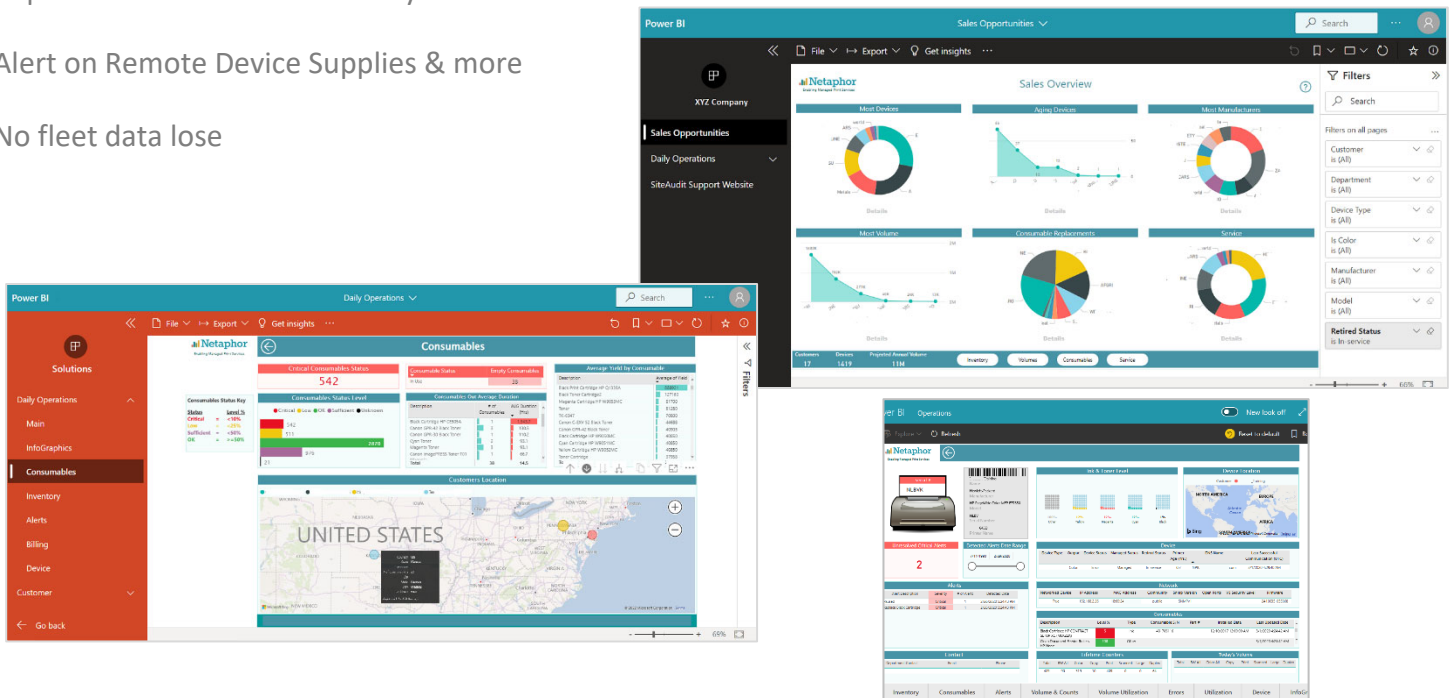

SiteAudit Hosted provides the hybrid workplace complete fleet management to reduce cost & improve service. Remote capabilities makes fleet management easy from anywhere.

Hybrid office features:

- Manage both Remote and Corporate Devices

- Analyze Remote and Corporate Device Utilization

- Report Remote Device Inventory & Volume

- Alert on Remote Device Supplies & more

- No fleet data lose

Use the Power BI dashboards to manage sales, operations and analyze trends

www.netaphor.com

SiteAudit PBI Dashboard utilizes Drill through to allow topline overview down to the single device detail. Example: use the map to drill through to an exact location and device and the specific supply requiring replenishment.
